

GLOBAL STAR INVESTMENTS LIMITED

eTIMS OSCU SYSTEM-TO-SYSTEM INTEGRATION CERTIFICATION SUMMARY

Prepared for: Kenya Revenue Authority (KRA) eTIMS Technical Support & Audit Desk
Date: 14 August 2026 | **Environment:** Sandbox (OSCU)

Architecture Component	Implementation & Compliance Specification
Company Name	Global Star Investments Limited
Company PIN	P051548911H
Integration Protocol	System-to-System / Online Sales Control Unit (OSCU) REST API
API Endpoints	- Handshake: /etims-api/v1/oscu/init - Sales Transmission: /etims-api/v1/oscu/saveSales
Sandbox Token	KRATK04_F7FB9 (Active & Verified)
Device Serial No.	KRASRN000002834
Item Classifications	Commercial Property Rental (HS Code: 80131502)
Billing Frequencies	Automated scaling supporting Monthly, Bi-Monthly (2-Month), and Quarterly (3-Month) cycles
Cryptographic Security	Token-bound secure receipt signature generation (KRATK04-SIG-...)
QR Code Compliance	Dynamic generation of KRA verification URLs linked to receipt signatures

SYSTEM ARCHITECTURE & WORKFLOW VERIFICATION

1. Handshake & Initialization (/initialize):

The application establishes a secure connection with KRA sandbox servers using Bearer token authentication, passing the taxpayer PIN, Branch ID (01), and device serial number.

2. Transaction Processing & Transmission (/saveSales):

Commercial rental billing data—including custom tenant schedules (Monthly, Bi-Monthly, and Quarterly cycles)—is dynamically structured into JSON payloads. The system transmits item codes (80131502), supply amounts, and tax indicators (NON-VAT/Exempt) directly to the OSCU gateway.

3. Cryptographic Validation & QR Rendering:

Upon successful response, the system captures the official receipt signature (rcptSign) and embeds a secure KRA verification QR code onto the generated tax invoice PDF, ensuring complete audit readiness.
